Hello! I'm Marat and I am a software engineer

Work Experience

Senior Software engineer, freshcells systems engineering GmbH

Software development, Düsseldorf, Germany, 06/2018-present
freshcells.de

Java Kotlin Docker Kubernetes Helm GCP Jenkins Bitbucket
Spring Boot Spring Cloud Data Flow Spring WebFlux RabbitMQ MongoDB
MySQL PostgreSQL Elastic Search GraphQL RSocket

Working on project **ProMaterial** (promaterial.com) as senior backend developer. Designing, developing and deploying highly distributed system in microservice architecture

"ProMaterial is the new technology network specialising in online sales of construction products. The innovative sales concept supports the search for and the purchase of building materials within milliseconds in different channels. ProMaterial already lists 200 manufacturers with 500,000 products for sale in Germany, Austria and Switzerland. "

Team lead / Software engineer, Cinarra Systems

Advertising Technology, Kazan, Russia, 12/2012-06/2018
cinarra.com

Java Spring Boot Maven Python PostgreSQL Hibernate Postgis AWS
Docker Consul CouchDB Couchbase Protobuf Kafka
Project management

“Cinarra is a technology startup that is addressing the changing economics of an increasingly mobile society. By uniting mobile operators and their unique “always on” data assets with the advertising ecosystem. Cinarra unlocks real-life data that makes it possible for advertisers to match campaigns to consumers' activities in the real world. Through groundbreaking technology, Cinarra is creating the foundation for a new mobile Internet economy. ”

Leading investors: SoftBank, Almaz Capital, and Cisco Systems.

I was responsible for:

- Digital advertising campaign management web platform, the platform enables advertisers to create campaigns; specify individual ads, associated budgets, targeting and technical parameters; upload and manage creative; as well as receive performance reports
- Financial subsystem, that responsible for funds management lifecycle starting from adding funds to campaigns, record and including all steps involved in subsequent credit/debit operations
- Databases from business logic perspective. Data consistency, data migration/flow
